Science Website Scavenger Hunt – Grade 8

One of the ways to become a successful student is to learn about your teacher’s websites. They are a wealth of information that you will need. Use Flippedoutscience.com (Mrs. Thomas’s website) to answer the following questions and to complete this assignment.

Scenario 1:

Oh no! Your new backpack split open as you got out of the car last night and all of your papers blew away in the driveway. One of them was your science homework on variables and the scientific method. List the steps that you need to go through to find another copy of the assignment so you can turn it in on time!

Scenario 2:

You are all ready to go this morning. You have your backpack, your lunch and homework folder. You have even double checked that you completed every assignment by looking in your planner last night. When you get to school, your friends remind you that the teacher told everyone to print the project rubric and bring it to class!! How do you solve the fact that you don’t have one?

Scenario 3:

Well, it finally happened. You Mom was right, you ate too much candy last night and you are vomiting marshmallows the next morning! You have to stay home but you are missing the review for the test. How can you use the website to review at home?
Scenario 4:
You checked your grades online and you failed the last quiz. You remember that your teacher said that you can make corrections to quizzes. List the steps you need to take to make corrections to a quiz and raise the grade to 70.

Scenario 5:
You have that sinking feeling about the test you didn’t study for. You just found out it’s true, you failed it. Now what? You know the best thing to do is to not live in denial and to confront the issue. How do you solve this problem? Give the steps necessary to re-test and raise your grade to 70.

Scenario 6:
You are asked by a friend to help them find the notes that they missed when they were absent. Talk them through how to find the class notes with a series of text messages. Your friend’s are on the page, fill in your text messages to respond to your friend.

I missed class – I need the scientific method notes.

On her website? But where? How do I print them?

Put your response to your friend here.
